WORK EXPERIENCE

🌐 Dropshiping Web App
March 2024 -

- *Currently immersed in full-stack web development at Qinshift Academy, I'm deeply involved in a real project a "dropshipping app", working alongside 12 colleagues from my academy. My role spans both front-end and back-end development as we strive to create a seamless user experience.*

🌐 Full stack Food-Delivery website
June-August(2 months)

- *I worked for 2 months on a food delivery website project, where I used React for the frontend and Express with MongoDB for the backend. Additionally, I developed a comprehensive admin panel for managing the site's content and operations.*
